INFORMATION SYSTEMS ANALYST

PROFESSIONAL SUMMARY

Information Systems and Data Analyst with a Master's degree in Computer Science and 9+ years across academic ERP environments, enterprise reporting workflows, and IT infrastructure administration. Experienced in application and production support, identity and access management, data validation and reporting, and systems implementation support, with recent contract delivery supporting a live multi-tenant platform and reviewing AI training-data quality. Combines structured systems analysis with hands-on automation, documentation, and reliability-focused operations.

CORE TECHNICAL SKILLS

- **Systems & Infrastructure:** Windows Server, Linux, Active Directory, Entra ID, Microsoft 365 Administration, Microsoft Intune, Exchange and SharePoint user support, TCP/IP, DNS, DHCP, VLANs, VMware, VirtualBox, Docker
- **Support & Service Operations:** Application and production support, incident and request workflow, ticketing and escalation, root-cause and recurring-issue analysis, ITIL-based service operations, endpoint and user-device support
- **Data & Reporting:** SQL/MySQL, PostgreSQL, Excel (advanced formulas and validation), Google Sheets, Power BI, Microsoft Fabric, ETL automation, reconciliation, data quality controls
- **Automation & Delivery:** Python, PowerShell, Bash, Git/GitHub, GitHub Actions CI/CD, automated testing, release and change coordination
- **Analysis & Governance:** Systems and business analysis, UAT and implementation support, technical documentation standards, knowledge management, process improvement

PROFESSIONAL EXPERIENCE

IT Application/Production Support Analyst — Sept 2025 - Sept 2026

Anchor Coaching - Remote, North York, ON

- Provided production and application support for a live multi-tenant coaching platform serving administrators, staff coaches, independent coaches, and clients.
- Ran support ticketing and incident workflow end to end, diagnosing recurring faults and converting them into preventive fixes rather than repeat tickets.
- Resolved a production scheduling fault that could let two clients book the same session, moving the safeguard into the database so it applies to every booking route.
- Built the payments and payouts process, including coach payouts and a reconciliation check confirming the fees charged match the fees actually deducted.
- Implemented application-level MFA enrolment and enforcement, Entra ID app registration, and delegated Microsoft Graph access for calendar and mail integration.
- Supported endpoints and user devices across computers, phones, tablets, printers and peripherals as part of the wider application and access operation.
- Authored 127+ chapters of role-based user documentation with automated link checking in CI.
- Administered custom domain setup and verification, business email delivery and transport security, and scheduled backups; shipped 300+ reviewed changes with nightly automated testing.

AI Training Data Scientist / Data Analyst — Dec 2025 - July 2026

Outlier - Remote, North York, ON

- Reviewed the rubrics and automated tests used to grade AI training data, checking each criterion had exactly one defensible interpretation.
- Flagged tests that passed for only one specific solution, tests that validated their own output, and criteria carrying incorrect scoring weights.
- Separated checks a machine can verify from those needing human judgment, and cross-checked findings against independent analysis.

IT Systems Support and Computer Instructor — Jan 2024 - Aug 2025

Pures College of Technology - Scarborough, ON

- Supported 250+ students with hands-on lab guidance across laptops, desktops, tests, and project sessions.
- Built and maintained Windows Server and Windows client virtual labs in VirtualBox/VMware, including Active Directory and identity-access practicals.
- Installed, imaged and troubleshot course tooling (VS Code, Eclipse, MySQL, Python/HTML/CSS/JS) plus collaboration and access workflows.
- Ran networking practicals covering VLAN basics, cabling, and connectivity troubleshooting, documenting repeatable lab setups.

Systems & Data Analyst / System Programmer (Head, System Programmer's Office) — Mar 2017 - Aug 2023

Federal University of Technology, Akure - Centre for Continuing Education

- Led the System Programmer's Office, owning admissions, examinations, academic records, and identity management for 4,000+ users.
- Migrated result processing from the legacy CLI-based Smarty workflow to the GUI-based Gradent platform, reducing turnaround from 3-5 days per programme to same-day and reclaiming 200+ hours annually.

- Processed and validated 800+ student records per cycle using SQL/MySQL querying, reconciliation, and pre-publication integrity checks.
- Provisioned and managed Active Directory users, staff and student portals, and departmental email, overseeing onboarding and offboarding across all Centre departments.
- Supported Microsoft Exchange and SharePoint for staff and students, and maintained IT asset inventory across laptops, tablets, biometric units and CCTV equipment.
- Built executive reporting in Excel, Google Sheets, and Power BI supporting enrolment planning and programme performance review.
- Provided Tier 1 to Tier 3 technical support, remote and on-premise, across all departments.

Computer Science (ICT) Teacher **Dec 2014 - Aug 2015**

Community Secondary School, Agulu-Awka, Nigeria

- Delivered foundational computer science instruction emphasizing logical reasoning and structured problem solving.

EDUCATION

- Master of Technology (M.Tech.), Computer Science, Federal University of Technology, Akure
- Bachelor of Technology (B.Tech.), Computer Science, Federal University of Technology, Akure
- Cloud Computing (coursework), Loyalist College

ADDITIONAL PRACTICAL EXPERIENCE

Enterprise-style home lab using Cisco Catalyst switching, VMware/VirtualBox virtualization, and Docker-based support utilities, covering routing, VLAN configuration, IP addressing, DNS, and DHCP in isolated test environments. Maintains domain and DNS operations and a CI-validated publishing pipeline for davidoncloud.com. Ongoing study toward CCNA and foundational cloud topics; these are study tracks, not completed certifications.
